

Equitable Equations: *Types of data*

This problem refers to the *erykah* data set, available on Moodle, which includes Spotify metrics on every song available by neo-soul artist Erykah Badu. You can learn more about the variables in the set at <https://developer.spotify.com/documentation/web-api/reference/get-audio-features>.

Determine the type and level of measurement of each of the following variables in this data set. Briefly explain your choices.

- tempo
- mode
- key_name
- liveness
